

nanopool®

product information WOOD PROTECT

Field of application:

nanopool® wood protect preserves the wood surfaces with a ultra-thin, non-visible anti-sticking refinement as e.g. parquet floors, laminate, toys. The refinement with this product provides the surfaces with excellent soil-resisting characteristics.

Storage temperature:

5°C to 30°C

Shelf life:

The storage time is at least 6 months for unopened original container. The opened product should be used as soon as possible.

Handling:

Please spray the nanopool® wood protect on the clean untreated wood surfaces at a distance of 25 cm. Optimum wood protection is achieved by spraying the surfaces 2 or 3 times.

Please note:

Important! For upcoming swellings we assume no liability. Not qualified for treated wood or wood containing oil.

Hardening time:

An optimum protection of the wood can be achieved by spraying the product 2-3 times on the surface. The hardening is completed after a period of 24 hours at an ambient temperature of 20°C.

Consumption:

nanopool® wood protect is very profitable. 20 to 30 m² can be refined with one liter.

Product features:

- hydrophobic
- dirt-resistant
- food safe
- weatherproofed
- easy spray application
- physiologically harmless
- UV solid
- permanent
- odorless
- breathing-active
- free of solubles
- ecologically sound
- non-corrosive and non-irritating

Composition:

SiO₂ solved in water

Containers:

size of containers on demand
